

Q1: What is photosynthesis?

Ans: Photosynthesis is the process by which green plants use sunlight to make their food.

Q2: Explain Newton's first law of motion?

Ans: Newton's first law states that an object at rest stays at rest and an object in motion stays in motion unless acted upon by an external force.

Q3: What are the components of a computer system?

Ans: The main components of a computer system are the input unit, output unit, central processing unit, and memory.

Q4: Define artificial intelligence?

Ans: Artificial intelligence is the simulation of human intelligence processes by machines, especially computer systems.
